

FLOAT LAYOUT ACTIVITY PSEUDOCODE: The CSS Code bellow is all required to make your HTML float layout assignment function. Clearly it' is NOT syntactically correct and much of the exercise has to do with you fixing the syntax.

```
box-sizing: border-box;  
text-align: center;
```

```
body  
font-size 24 PIXELS  
line height 32 PIXELS  
color #333
```

```
header  
padding 20 PIXELS  
margin bottom 20px PIXELS  
color #333  
background FFA500
```

```
section  
padding 20 PIXELS  
margin bottom 20 PIXELS  
background FFA500
```

```
left  
float left  
width 33.3 Percent  
color #fff  
background 30948D
```

```
middle  
float left  
width 33.3 Percent  
color #fff  
background 9E1212
```

```
right
```

float left
width 33.3 Percent
color: #fff
background 30948D

full
width 100 Percent
overflow auto
clear both
color #fff
background 394549

division
padding 20 PIXELS
margin top 20 PIXELS
background 214fb3

aside
float left
width 33 Percent
height 200 PIXELS
padding 20px PIXELS
margin left 30 PIXELS
text decoration color white
background a6b747
border 1 PIXEL SOLID #eee

footer
padding 20 PIXELS
clear both
background FFA500
